# Spray & Vac Window Cleaner Range

## Let's get started

H86-WV Series

[vax.co.uk](http://vax.co.uk)

# Let's talk safety

## Basic safety precautions

**This Spray & Vac is intended for household use only and NOT for commercial or industrial use.**

- When using the Spray & Vac basic safety precautions should always be observed, including the following
- Keep fingers, hair and loose clothing from moving parts and openings whilst using the Spray & Vac
- This appliance can be used by children aged 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they

have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision

- Only Vax recommend charger, accessories and solution should be used with this Spray & Vac

**Please keep instructions for future reference and use the Spray & Vac only as instructed in this guide**

## Don'ts

**This Spray & Vac is intended for indoor use only and NOT for outdoor use.**

- ✗ Don't use this Spray & Vac if it has been dropped, damaged, immersed in water or left outdoors
- ✗ Don't unplug the Spray & Vac or pull the Spray & Vac by the charger cord. Don't use the charger cord as a handle, pull the charger cord around corners or sharp edges or close a door over the charger cord
- ✗ Don't charge the Spray & Vac if the Charger cord or plug is damaged. Please contact our Customer Care Line
- ✗ Don't use the Spray & Vac charger with incorrect voltage as this may result in damage or injury to the user. The correct voltage is listed on the ratings label

- ✗ Don't handle the plug or use the Spray & Vac with wet hands
- ✗ Don't use the Spray & Vac whilst connected to the charger unit
- ✗ Don't throw the Spray & Vac into fire or expose to high temperatures, as the Spray & Vac contains a rechargeable battery which may cause damage or burst. Never dismantle the battery or replace with a different type
- ✗ Don't attempt to remove blockages with sharp objects as this may cause damage to your Spray & Vac
- ✗ Don't vacuum up hot coals, cigarette butts, matches or smoking hot burning items or use in an area where there may be harmful fluids (chlorine, bleach, and ammonia drain cleaner)

## Do's

- ✓ Only use the Spray & Vac indoors on vertical surfaces
- ✓ Always make sure water container are fitted correctly before using your Spray & Vac
- ✓ Turn off all controls on the Spray & Vac before disconnecting or connecting the charger
- ✓ Always switch off the Spray & Vac and disconnect the charger before carrying out any maintenance
- ✓ Always replace the fuse in the plug with a British 13amp fuse. Always protect the charger cable from heated surfaces or near open flames

- ✓ Use only CE approved 13amp extension cords, non-approved extension cords may overheat
- ✓ Always charge the Spray & Vac indoors
- ✓ Always carry the Spray & Vac by the handle
- ✓ Store your Spray & Vac in a cool, dry area away from children
- ✓ Only use Vax recommended batteries and solution

# Thank you for buying this Spray & Vac

## Taking care of your windows

The Spray & Vac Window Cleaner is designed to clean windows regularly as effectively and efficiently as possible and this user guide will help you get the most out of your machine. Clean windows look better and make your home brighter.

## Taking care of your Spray & Vac

Also inside this guide are instructions on maintaining your new machine, so that it's always ready when you are to tackle your windows.

## Taking care of you

## Technical Specification

Name Spray & Vac  
Voltage 3.7V  
Weight 0.8kg  
Run time 30 minutes  
Charge time 3 hours  
Battery Type Lithium-ion  
Battery capacity 1500mAH  
Charger Model KSA34A0550060VKD  
Charger input 100-240v 50/60hz 0.15A  
Charger output 5.5V---0.6A

Subject to technical change without notice.

## Accessories & Consumables

Microfibre pads (Type 1)\*  
1-1-133091-00  
Scrub pads (Type 2)\*  
1-1-133092-00  
Glass cleaner concentrate 500ml\*  
1-9-132547-00

\*To purchase consumables and accessories, please visit [vax.co.uk](http://vax.co.uk)

# Getting started

PLEASE READ 'LET'S TALK SAFETY' AT THE BEGINNING BEFORE USE

## Assembling your window vacuum

Choose microfibre/scrub pad and push onto the fastening strip

Insert the suction head into the machine and push until it clicks into place

To remove the suction head, press the suction head release button and gently pull

Note: The microfibre pad is for general cleaning and the scrub pad for cleaning stubborn marks

# Using your machine

## Using your window vacuum

Insert the charger cable into the power charger connector. Plug the charger into the mains. Power charger indicator light will flash during charging, when fully charged the indicator light will show solid red. The Spray & Vac will need to charge for 2 hours

Squeeze the tank release buttons to remove the tank from the window vacuum

Turn the lid of the cleaning solution tube anticlockwise and lift to remove

Pour 40ml of Vax window solution into the cleaning solution side of the dual tank, using the funnel

Top up with water (Max 35°C) to MAX line on solution side of the dual tank and turn the cap clockwise to close

To attach the dual tank back onto the unit, insert top first and gently push the bottom until it fastens into place

Pull the trigger to spray solution onto the surface to be cleaned

Wipe/scrub the surface with the microfibre or scrub pad on the suction head

**Note:** You may need to press the trigger a few times first before solution is dispensed, this clears air from the system

Turn the Spray & Vac on using the power on/off button

Vacuum up the water using slow, straight strokes

When you reach the bottom of the window, apply pressure and the suction head will pivot

# Taking care of your machine

**Note:** The Spray & Vac must be emptied after each use – DON'T store water/solution in the machine between usage

## After every use

Squeeze the tank release buttons to remove the tank from the Spray & Vac

Lift the emptying cap to let the dirty water out of the tank

Wipe the squeegee with a damp cloth to remove any excess water

## Cleaning the removable squeegee

To remove the squeegee, pull and slide through the suction head

Wash the squeegee under running water (Max 40°C) to remove dirt and debris. Let it dry

To attach the squeegee push and slide through the suction head

# What to do if it goes wrong

## Problem

**Why won't the window vacuum turn on?**

## Solution

- The battery may not be charged. Connect the charger, the indicator light will flash red when charging and show a solid red light when fully charged. The initial charge should be for 2 hours.
- The unit might be plugged in. The window vacuum will not run when the charger is plugged in

**Why won't the window vacuum pick up?**

- The squeegee blade may be blocked, remove from the machine, rinse and clear any dirt/debris
- The window vacuum may be low on charge, plug the window vacuum in to recharge
- The dual tank may be full, empty the dual tank

**Why does my window vacuum leak?**

- You may be using the window vacuum on a flat, horizontally surface, only use the window vacuum on vertical surfaces
- The dual tank may be full, empty the dual tank

**Why does my window vacuum leave a smear on my window?**

- The squeegee blade is dirty, detach and clean. Go to 'Taking care of your machine' page 8

**Why won't the battery recharge?**

- The charger may not be inserted correctly
- Check the mains power is switched on
- The electrical outlet may not be working. Check the fuse in the plug, always replace with a British 13amp fuse

**Warning:** Always turn off and unplug the Spray and Vac before carrying out and maintenance/troubleshooting checks
